## Major Increase in Professional Geoscientists Registered in Ontario

Toronto, Ontario – The Association of Professional Geoscientists of Ontario (APGO) is very pleased to announce that an additional 160 professional geoscientists were registered as members of the Association in August plus an additional 2 geoscientists-in-training. The individuals newly registered are shown on the attached table.

Total membership in APGO is now 368 including 3 geoscientists-in-training. An additional 48 applications are complete and will be reviewed at the next meeting of the Registration Committee in September 2002. 263 further applications are incomplete and will be processed as soon as all documents are received. In total, therefore, 679 individuals have now applied for membership in APGO.

“The registration staff and members of the Registration Committee have worked very hard in the last month to clear up the backlog in applications” said Bill Pearson, President of APGO. “Thanks to this tremendous effort, we have now caught up on processing completed applications.”

Pearson went on to say that “What is of concern to us is that there are over 2,100 names of geoscientists in our database and we have yet to hear from over 1,400 of these even though they have all been sent application packages”. “On August 30, 2002 which is today, Section 3 of the Act is “in-force” and requires individuals practicing professional geoscience in Ontario to be members of APGO”, Pearson noted. “Geoscientists that are not licensed, unless specifically exempted under the Act, will be in violation of the law in Ontario.”

Greg Finn, Chair of the Registration Committee comments: “We have heard every excuse in the book as to why people have not submitted their applications yet. It is time that everyone who has not applied put aside an evening and get it done – it’s not that hard and it will, after all, ensure their ability to practice their profession in Ontario”.

APGO will be shortly writing a letter to all individuals in the database who have not sent in an application requesting confirmation that they will be applying for membership and registration unless exempt under the Act or confirming that they will not be practising professional geoscience in Ontario.

APGO’s mission is to serve the public by regulating, enhancing and providing leadership in the practice of the profession of geoscience in Ontario. Information about APGO and how to apply for membership is available on the Association website at [www.apgo.net](http://www.apgo.net).
