Over 500 Professional Geoscientists now registered in Ontario

Toronto, Ontario – the Association of Professional Geoscientists of Ontario (APGO) is pleased to announce that an additional 137 professional geoscientists have been registered as members of the Association. This brings the total number of geoscientists registered to practice professionally in Ontario to 501. In addition, there are now 9 Geoscientist-in-Training members. Those individuals newly registered are shown on the attached table.

The Association has another 288 applications in hand, over half of which are complete and ready for consideration by the Registration Committee. Registration Committee meetings are being held on a weekly basis, often with two panels sitting.

Oliver Bonham, M.Sc., P.Geo., the recently appointed Executive Director/Registrar, said “While there are still a number of applications to process, staff at APGO and the Registration Committee are working very hard to ensure that these files are processed promptly. I am concerned, however, that the number of new applications arriving at the APGO office has recently dropped off dramatically. It appears that there are a good number of geoscientists who may be practicing who have not yet applied but still need to do so.”

To address this issue, the Association recently completed a mail-out to over 1300 geoscientists in its database, who have not yet applied to register. The letter reminded the individuals that if they are practicing professional geoscience in Ontario, registration is a requirement under *The Professional Geoscientists Act, 2000* since August 30, 2002.

APGO’s mission is to serve the public by regulating, enhancing and providing leadership in the practice of geoscience in Ontario. Information about APGO and how to apply for membership is available on the Association website at www.apgo.net.
