

## APGO thanks its partners for a successful roll-out of learning events in October 2018

A good partnership can significantly improve an organization's ability to achieve its goals. Through a collaborative framework, the APGO strives to provide its members with a good mix of free and fee-based professional development opportunities to promote lifelong learning. In October, the APGO was able to provide three webinars on a variety of interesting topics, all of which were very well received. For those who missed the webinars, presentation slides can be viewed via this [link](#). APGO has two more webinars coming up this November.

As well, through our partnership with RPA Inc., we were able to offer the course on The Fundamentals of Mineral Resource Estimation to our members in Sudbury. Based on the feedback we compiled, 100% of participants would recommend this course to their colleagues.

The APGO gratefully acknowledges the following professionals who partnered with us to provide excellent learning opportunities for our members in October 2018.

### **Marc Tassé and Patrice Poitevin**
