

RPA Inc.'s professional team delivered excellent course on Mineral Resource estimation

The APGO would like to thank RPA Inc. for partnering with us to deliver a short course on The Fundamentals of Mineral Resource Estimation. The course, which was taught in Toronto on September 19, 2018 by a team of experts – David Ross, Valerie Wilson, Sean Horan, Jason Cox and Luke Evans, gave participants a comprehensive overview on the important steps involved in the process of Mineral Resource estimation and tips on best practices. Notable was the critical impact of geological interpretation and resource domains on the validity of a resource estimate. But most importantly, the course underscored the importance of a team approach to the whole process with emphasis on the critical role of peer-review to conduct the Mineral Resource validation.

Overall, the course was very well received with participants' feedback showing excellent rating for both the course materials and the presenters. This course will be offered again in Sudbury on October 24 and 25, 2018. Don't miss this great learning event. For details, please click on this [link](#).
