

Did you know:

- 40.6% of APGO student members were women in 2016;
- 50% of APGO student members are women today;

As scientists, we defer to the hard evidence of facts – and more than anything, these numbers demonstrate growing positive Geoscience Culture that recognizes best scientific practice, strong ethics, and evidence-based decision making as the sole standards of responsible geoscience.

Geoscientists:

The Council of the Association of Professional Geoscientists of Ontario (APGO), its staff and volunteers, join you in the celebration of International Women’s Day (IWD), and the importance it brings for equality, egalitarianism, and women’s rights. On this IWD, let’s celebrate the generations that are building the balanced workforce of tomorrow. We have something to learn from them!

Yours in geoscience,

Zen Keizars, P.Geo.
President – APGO
