

Senior Contaminant Hydrogeologist / Environmental Engineer

Azimuth Environmental Consulting, Inc.

Barrie, Ontario

Azimuth is a small independent environmental consulting firm consisting of 20 professional staff. We have successfully provided a diverse spectrum of environmental services to private and public clients located mainly in Central Ontario for the past 20 years. Azimuth provides a unique and intimate work environment where our entire staff interacts as a team.

The lateral structure of the organization permits individuals to pursue their goals while supported by a talented array of corporate professionals. We pride ourselves on providing high-quality services that exceed our customer's expectations. Many of our clients have engaged our services for years because of the quality of service received. Our aim is to recruit, develop, and most importantly, retain the people who share our vision and strategy.

Your Challenge

Azimuth is seeking an experienced senior contaminant hydrogeologist or environmental engineer with strong technical, leadership, communication, and business development skills who is eager to champion this discipline in our organization. We are seeking a qualified person with strong technical knowledge in contaminant hydrogeology, and proven business development and communications capabilities. This individual should be a team focused practitioner with the maturity to successfully lead and develop the corporation's practice in this discipline.

Your Responsibilities and Accountabilities:

- preparation of technically accurate correspondence, project scope and cost proposals, technical reports, work plans, and project specifications as a Qualified Person;
- project management and execution of environmental site assessments and remediation programs, including the development and maintenance of project scopes, schedules and budgets, and coordination of staff;
- intimate understanding of environmental regulations to successfully meet the client's requirements;
- senior technical reviewer for discipline works;
- expert for contaminant hydrogeology on multi-disciplinary projects;
- aid in identifying markets and potential clients and attend industry events as a technical resource to further business development;

Minimum Qualifications:

- Bachelor's or Master's degree, from an accredited institution, plus appropriate continuing education in contaminant hydrogeology or ground water engineering;
- registered professional practitioner in Ontario (e.g. P.Eng., P.Geo.);

- 10+ years of experience in contaminant hydrogeology work;
- established QP under MECP designation;
- solid understanding of the regulatory requirements in Ontario;
- ability to present technical information, both written and verbally, in a concise and professional manner;
- accomplished technical editor and critical reviewer;
- supervisory, project management, and client management experience required; and
- demonstrated capability to train, mentor and develop junior and intermediate staff.

Azimuth offers an excellent remuneration & benefits package, a friendly, professional, dynamic and flexible work environment along with the opportunity to develop your career prospects.

We thank all candidates for their interest; however, only those selected for interviews will be contacted. Azimuth is an equal opportunity employer.
